

CONTENTS

Chapter I Preliminaries

1.1 Elements of Functional Analysis	3
1.2 Distributions; Sobolev Spaces.....	15
1.3 Monotonous Operators.....	26
1.4 Convex Functions	50

Chapter II Linear Evolution Equations

2.1 Semi-groups of Linear Operators.....	81
2.2 C_0 - Semi-groups	115
2.3 Evolution Linear Equations	120
2.4 Hyperbolic Linear Equations	144
2.5 Homogeneous Parabolic Equations	166
2.6 Non-homogeneous Parabolic Equations	196
2.7 Applications	222
2.8 An Application in Mechanics.....	238

Chapter III Nonlinear Evolution Equations

3.1 Existence and Uniqueness Theorems.....	252
3.2 Semi-groups of Nonlinear Operators	268
3.3 The Stability of the Solutions.....	291
3.4 On the Weak Convergence	306
3.5 On the Strong Convergence	330
3.6 The Properties of the ω - limit Set.....	349
3.7 Applications	358
3.8 Hyperbolic Systems	390
Bibliography.....	409
